

Creating a comfortable environment for guests is paramount in today's competitive hospitality landscape. As part of the Rheem® Family of Brands, we offer a comprehensive suite of essential product solutions to meet the hospitality industry's unique needs, providing a seamless guest experience while helping owners control operational costs.

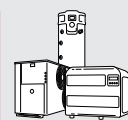

Solutions for Every Space

We offer solutions for the essential needs of your hotel with products for comfort, cooling, enhancing indoor air quality, refrigeration and water heating.

Terminal Heat Pumps
Individualized comfort in each guest room

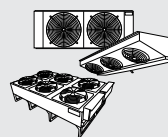

Water Heating Solutions
Efficiently provide hot water throughout the building—in kitchens, bathrooms, laundry rooms and pools

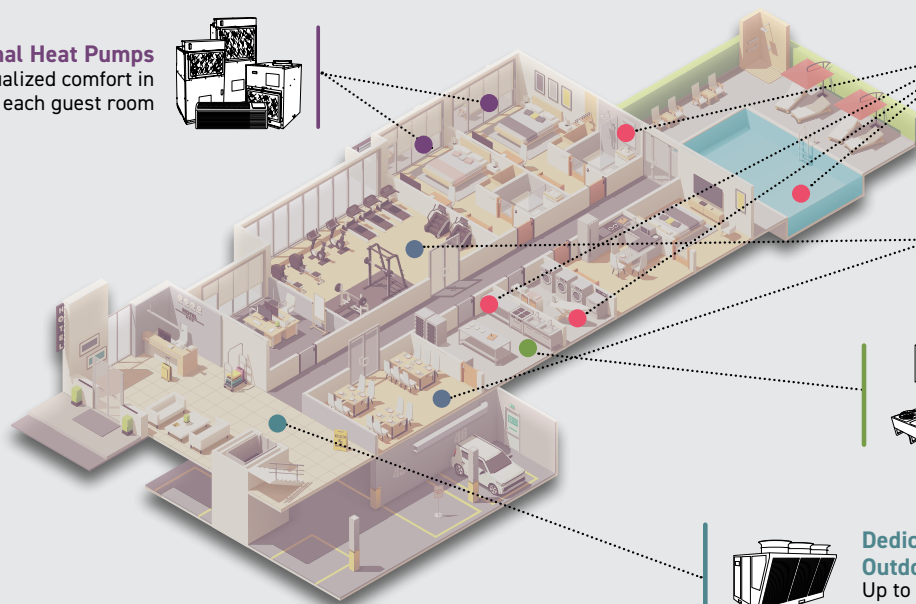

Packaged Rooftop Units (RTUs)
Reliable comfort for common areas: lobby, restaurants, meeting rooms, etc.

Refrigeration Solutions
High efficiency walk-in coolers, freezers and refrigeration products

Dedicated Outdoor Air Systems
Up to 100% fresh air everywhere

Why Hotels Choose Friedrich Commercial Air

Hotels and motels come in all shapes and sizes, promising wide-ranging levels of guest experiences with different types of spaces that need to be comfortable. But they all have the same metrics for success: **guest satisfaction and profitability.** Here's how Friedrich® helps hotels hit their goals:

Enhanced Guest Comfort & Satisfaction

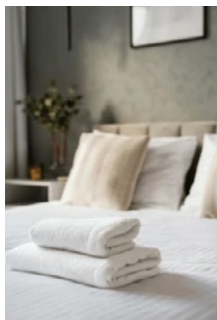

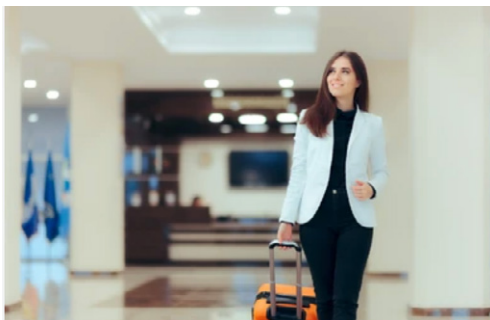

Friedrich joined the Rheem Family of Brands in 2021, bringing our advanced terminal heat pump products like PTAC, Vert-I-Pak® and VRP® to allow precise climate control in each guest room, ensuring a comfortable and relaxing stay.

Reduced Operational Costs

Energy efficiency is a significant concern for hotels because it can mean lower utility bills. High-efficiency in-room packaged systems minimize energy consumption with variable speed options. Additionally, with rooftop units, our open approach to controls allows for integration with existing or preferred building management systems, allowing hotels to monitor usage and further optimize energy use.

Compliance Made Easy

Ensuring compliance with new refrigerant regulations can be complex. Our active participation in the industry's regulatory landscape and future-ready solutions comply with the latest environmental standards, offering peace of mind and avoiding potential disruptions to your business operations associated with outdated systems.

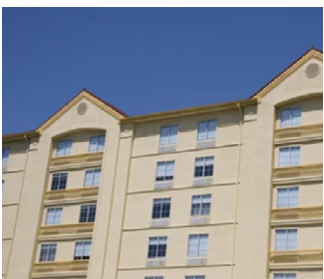

Seamless Integration

Maintaining control over your HVAC system is essential. Friedrich's rooftop units boast an open approach to controls, integrating seamlessly with most building management systems of choice. This allows for centralized monitoring and control, streamlining maintenance and operation.

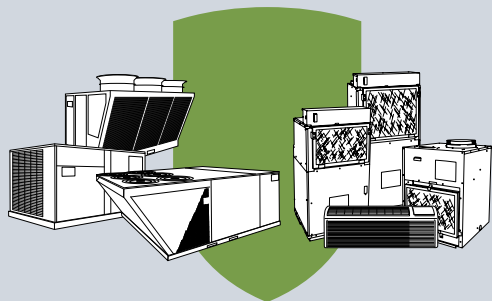

A Healthy Partnership

Being a good partner is integral to how we do business, which is evident in our 360+1 design philosophy. We solicit customer input during product development and have publicly stated aggressive sustainability goals. Our mission is to decrease our carbon footprint and send zero waste to landfills. Choose Friedrich Commercial Air if you're looking for a long-term partner focused on supporting you throughout the product life cycle.

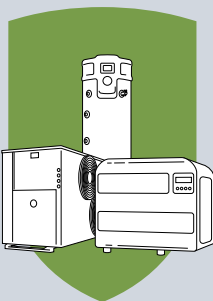

Essential Solutions – Air, Water and Refrigeration

As a leading global provider of heating, cooling, water heating and commercial refrigeration products, our global footprint is paired with local support and availability—meaning we're a reliable partner who's always within reach.
