

FRIEDRICH

# FDTG/FDTG-R Series High Efficiency Non-Condensing Tankless

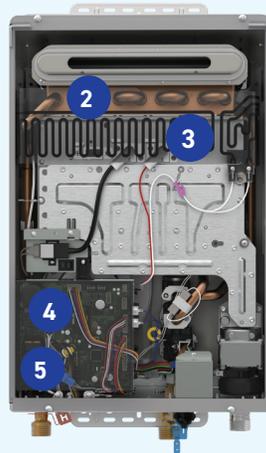

With the same proven performance both plumbers and homeowners trust, the Friedrich® FDTG/FDTG-R High Efficiency Non-Condensing Tankless Water Heaters have a new modern design. These smaller, lighter units were designed with contractors in mind to make one-person installation and servicing even easier. Plus, enhanced features deliver no-wait hot water and energy efficiency homeowners want.

New!  
Built-in  
Recirculation

These products meet a stringent set of our internally defined sustainability standards.<sup>3</sup>

<sup>1</sup>Friedrich is the only leading tankless manufacturer offering this technology.  
<sup>2</sup>Available on indoor Wi-Fi models only. When converting indoor Wi-Fi with LeakGuard models to outdoor, included cable and indoor mount should be used. This cable disables LeakGuard in outdoor installations to avoid false alarms and shut-off. Reference outdoor conversion instructions for more information on cable installation.  
<sup>3</sup>Sustainability Standouts are Wi-Fi models only.  
<sup>4</sup>Based on comparison of a Friedrich FDTG/FDTG-R Series model against a standard residential 50-gallon tank type model with like fuel type.
